PRINT FINISHING SOLUTIONS

Affordable Die Cutting
and Dry Mounting

Affordable Die Cutting and Dry Mounting

Studios, labs, printers, photo and scrapbook retailers can produce precision-cut sheets of photos, trader cards, business cards, photo specialties and printed pieces. iMARK Print Finishing Solutions completes your workflow. Interchangeable professional steel-rule dies cut into plastic with a cost of less than 1¢ per image. Accessories convert the machine to a mounting, magnet or laminating system.

Features

- Award-winning roller technology
- Registration pins ensure accuracy
- Downloadable Adobe® Photoshop® actions
- Double-format, specialty and custom dies
- Optional transparent die vinyls

How to Die Cut with iMARK

Step 1: Place die completely inside tray, **FOAM SIDE UP**. Place print sheets on die, **IMAGE SIDE DOWN**, inside retractable registration pins.

Step 2: Place cutting plastic on top of material to be cut, covering all registration pins. Slide die, tray, material and plastic to meet roller. Turn handle to feed through machine.

Step 3: Remove cut images and repeat process from opposite direction.

Can't find the shape you want in the catalog or at www.GOiMARK.com?
 Get a custom-made die, unlike any other in the world, that fits your need perfectly! Call our custom die specialist at 888-464-6275 or send a request to info@GOiMARK.com.

iMARK® Supplies and Accessories

iMARK Dry Mounting

Dry mount prints as large as 15" x 20", no electricity required. Contains tray, mounting base and instructions. Also works with self-adhesive laminating materials.

Magnetic, Adhesive & Laminating Supplies

Make magnetic cards and photos with self-adhesive magnet – easy to cut with iMARK. Purchase Xyron® system for adhesive and laminating options.

Specialty Dies

Create additional revenue with photo cubes, table tents, puzzles, Convertibles™ cards, envelopes, door hangers, boxes for wallet photos or business cards, and more. Custom dies offer endless options for fun packs, CD envelopes, proof boxes...you name it!

"This piece of equipment is phenomenal—the speed, accuracy and dependability. We have increased production capabilities probably 1,000%. We've cut thousands and thousands of trader cards with this machine and it makes our product look very professional—comparable to major league trader cards! You would be foolish not to try an iMARK die cutter before you invest thousands of dollars on a pneumatic one. It's lightweight, easy to move and easy to run. Nothing's ever gone wrong with it. I hope my competition doesn't have it!"

Joe Marcelletti, Jr., Sports Journal Photos

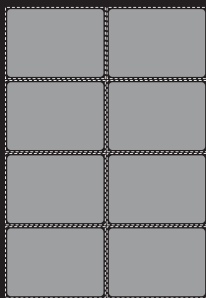

5 Important Reasons to have an iMARK® die cutter

- Make More Money
- Total Workflow Control
- Meet Critical Deadlines
- Affordable In-House Print Finishing
- Ensure Residual Profits and Customer Satisfaction
